

# Massachusetts Case Mix

## Hospital Inpatient Discharge Data (HIDD)

Fiscal Year 2020

Documentation Manual

# Massachusetts Case Mix FY 2020 Hospital Inpatient Discharge Data

## USER GUIDE

### Table of Contents

Executive Summary.....	3
Part A. Data Collection .....	4
Part B: Applying For and Using CHIA Data .....	6
Part C: Data Elements .....	8
Part D. Data Notes .....	76

## Executive Summary

Each quarter, Massachusetts facilities provide to the Center for Health Information and Analysis (CHIA) data collected from acute care hospital inpatient discharges. The FY2020 Hospital Inpatient Discharge Database (HIDD) includes inpatient discharges that occurred between October 1, 2019 and September 30, 2020. Facilities reported a total of 747,060 discharges.

The FY2020 HIDD Guide provides general information about CHIA's most recent inpatient discharge data holdings. This information includes high level data notes (data collection, data application, and use) and a codebook (data element list, data dictionary, reference tables, and summary statistics).

## Part A. Data Collection

Acute care hospitals in Massachusetts are required to submit inpatient discharge data to CHIA under 957 CMR 8.00 - APCD and Case Mix Data Submission and Regulation 957 CMR 5.00: Health Care Claims, Case Mix and Charge Data Release Procedures. Researchers can access HIDD regulations by visiting CHIA's web site at <http://www.chiamass.gov/regulations> or by faxing a request to CHIA at 617-727-7662.

**957 CMR 8.00 - APCD and Case Mix Data Submission** requires acute care hospitals to submit inpatient discharge data to CHIA 75 days after each quarter. The quarterly reporting intervals for the FY2020 HIDD are as follows:

- **Quarter 1: October 1, 2019 - December 31, 2019**
- **Quarter 2: January 1, 2020 – March 31, 2020**
- **Quarter 3: April 1, 2020 – June 30, 2020**
- **Quarter 4: July 1, 2020 – September 30, 2020**

CHIA reviews each hospital's quarterly data for compliance with *957 CMR 8.00 - APCD and Case Mix Data Submission* using a one percent error rate. The one percent error rate is based upon the presence of one or more errors per discharge for the hospital's quarterly submission. CHIA checks for valid codes, correct formatting, and presence of the required data elements. If one percent or more of the discharges are rejected, CHIA rejects the entire quarterly submission.

Each hospital receives a quarterly error report displaying invalid discharge information. Quarterly data that does not meet the one percent compliance standard must be resubmitted by the reporting hospital until the standard is met.

### Emergency Department (ED) Visits and Outpatient Observation Unit Initiated Stays

Discharges that began in an ED Visit and ended in an inpatient discharge will have a code '2' in the ED Flag Code field. Discharges that began in an observation unit stay and ended in an inpatient discharge will have a code '2' in the Outpatient Observation Stay Flag Code field. Any ED visit or observation stay that resulted in an inpatient discharge will appear in the FY2020 HIDD and should not appear in the FY2020 Outpatient Emergency Department Database or FY2020 Outpatient Observation Stay Database. If the ED Flag Code is '2', or other evidence of an emergency department visit is noted in the data, such as source of admission code is 'R' (within hospital emergency room transfer) or '045X' revenue codes in the service table for ED utilization, then Providers are requested to report ED Boarding information. This information is reported in five fields:

- Number of hours in the ED
- ED Registration Date
- ED Registration Time
- ED Discharge Date
- ED Discharge Time

## HIDD Verification Report Process

Semi-annually CHIA sends each hospital a profile report of their discharge data to maintain and improve the quality of their submissions. The Verification Report process gives the hospitals the opportunity to review the data they have provided to CHIA and affirm data accuracy and completeness.

CHIA asks each hospital to review and verify the data contained within the report. Each Verification Report has a series of frequency tables for selected data elements that include, but are not limited to, the number of discharges per month and breakouts by admission type, admission source, race, and patient status.

Hospitals must affirm that reported data is accurate and complete or identify any discrepancies on the year-end verification cycle. Hospitals certify the accuracy and completeness of their data by completing a Verification Report Response form. CHIA accepts two response types from hospitals:

**A:** A hospital indicates its agreement that the data appearing on the Verification Report is accurate and that it represents the hospital's case mix profile.

**B:** A hospital indicates that the data on the report is accurate except for the discrepancies noted. If any data discrepancies exist, CHIA requests that hospitals provide written explanations of the discrepancies.

Users interested in the FY2020 HIDD Verification Reports should contact CHIA at [CaseMix.data@state.ma.us](mailto:CaseMix.data@state.ma.us). Please indicate the fiscal year of the Verification Report, the dataset name, and if the information is needed for a specific hospital or set of hospitals.

## Part B: Applying for and Using CHIA Data

Researchers interested in receiving approval to access CHIA data should follow the instructions below to apply for the data. Due to the custom nature of each data use request, limited information covering all data uses is provided by CHIA. Users needing additional assistance applying for data or using the data should contact CHIA at [CaseMix.data@state.ma.us](mailto:CaseMix.data@state.ma.us).

### How to Apply for the Data

- To obtain a copy of the Application Form, Data Use Agreement, Data Management Plan and/or other documents required for application, go to: <http://www.chiamass.gov/chia-data/>
- Follow the links to the forms that correspond to the data (Case Mix, MA APCD) and application type (Government, Non-Government) that are appropriate to the data request.
- Information on the Hospital Case Mix and Charge Data Fee Schedule is available on the following link: <https://www.chiamass.gov/assets/docs/g/chia-ab/1705.pdf>
- All application documents must be submitted to CHIA and are managed through IRBNet.org. Instructions for submitting application materials through IRBNet are available on the following link.
- Non-Government applicants can accept approval to use a pre-configured Limited Data Set (LDS), designed to protect patient data confidentiality while ensuring analytic value. This streamlined dataset also improves CHIA's ability to deliver the data efficiently.
- The data contained in Case Mix databases include personal information and Protected Health Information, the release of which is restricted by state and federal laws and regulations. The application process has been designed to help applicants prepare applications that will allow the release of the data while protecting patient privacy. For this reason, applicants should familiarize themselves with CHIA's APCD and Case Mix Release Regulation (957 CMR 5.00) and the forms and other background information referenced above.

### Securing CHIA Data Prior to Use

Approved data recipients, or agents, are obliged by the application and confidentiality agreement to secure the data in a manner that protects the confidentiality of the records and complies fully with the terms of CHIA's Data Use Agreement. All data obtained from CHIA must reside on an encrypted hard drive and/or secure network.

### Data Delivery

CHIA delivers HIDD on CD-ROMs. Data users must be able to meet the following Hardware and CD requirements. Users must also be able to read and download the data files to their back office.

### Hardware Requirements:

- CD ROM Device
- Encrypted Hard Drive with 2.0 GB of space available

## Data Use

The FY2020 Case Mix HIDD consists of up to 13 Microsoft Access Database (.mdb) files or 9 SAS files (.sas7bdat). Each file name will have a suffix of “\_Full\_AAAA\_BBBB”. AAAA indicates the specific view of the data. BBBB indicates if the data is an LDS or Government dataset.

- The main FIPA\_HDD\_2020\_**Discharge**\_ (table name: Discharge), contains one record per discharge. The unique identifier on this table is the RecordType20ID.
- FIPA\_HDD\_2020\_**DiagnosisCode**\_ (table name: DiagnosisCode), contains one record per diagnosis reported for each visit. The Discharge table has a one-to-many relationship with this table by linking the RecordType20ID.
- FIPA\_HDD\_2020\_**ProcedureCode**\_ (table name: ProcedureCode), contains one record per procedure for each visit. The Discharge table has a one-to-many relationship with this table by linking the RecordType20ID.
- FIPA\_HDD\_2020\_**Service**\_ (table name: Service), contains one record per revenue code service reported for each visit. The Discharge table has a one-to-many relationship with this table by linking the RecordType20ID.
- FIPA\_HDD\_2020\_**Organization**\_ (table name: Organization) contains one record per organization. This table can be used to lookup facility names, EMS region, and Teaching status. The Discharge table has a many to one relationship with this Table by linking the appropriate OrgId (IdOrgFiler, IdOrgHosp, IdOrgSite or IdOrgTransfer).
- FIPA\_HDD\_2020\_**SubmissionLog**\_ (table name: SubmissionLog) contains one record per quarter for each of the Inpatient facilities filing data. The Discharge table has a many to one relationship with this Table by linking the IdOrgFiler.
- FIPA\_HDD\_2020\_**Error Log**\_ (table name: ErrorLog) contains records by quarter and by fiscal year on the number of records pass and fail and the reason for fail by IdOrgFiler. The Discharge table has a one- to- many relationship with this Table by linking the RecordType20ID.

### **Diagnosis-Related Groupers (DRGs):**

- FIPA\_HDD\_2020\_**APR200**, FIPA\_HDD\_2020\_**APR261**, FIPA\_HDD\_2020\_**APR300**, FIPA\_HDD\_2020\_**APR340**, FIPA\_HDD\_2020\_**APR360**, FIPA\_HDD\_2020\_**CMS372** contain grouper data. In the Microsoft Access Database (.mdb) release, each of the DRG versions are released as separate tables. The Discharge table has a one-to-one relationship with each table by linking the RecordType20ID.

## Linking Files

Historically, case mix data users receive a Microsoft Access version of the data.. Many users import the data into SQL, STATA™, SPSS™, SAS™, or R for analysis or data management. To accommodate the expanding one-to-many relationship between the main discharge table and other tables (due to lifting the limit on the number of diagnoses and procedure codes), files distributed will contain multiple tables that are linked using the RecordType20ID field. The RecordType20ID field is a unique identifier used to link the main Discharge table to Services, Diagnoses, DRGs and Procedures tables. The OrgID field in the Organization table can be linked to columns on the Discharge table fields that contain Organization ID numbers (IdOrgFiler, IdOrgSite, IdOrgHosp, and IdOrgTransfer).

## Part C: Data Elements

The following section should provide the user with an explanation of some of the data. For more information about specific data elements, facility reporting thresholds, or other questions about the data, please contact CHIA at [CaseMix.data@state.ma.us](mailto:CaseMix.data@state.ma.us).

### About the Limited Data Set (LDS)

The pre-configured Limited Data Set (LDS) is designed to protect patient data confidentiality while ensuring analytic utility. All approved data applicants receive the “core” data elements. Data applicants seeking approval to add to the “core” elements must indicate this by selecting from the list of “buy-ups.” An applicant could use the “Buy-up” process to receive more granular data. For example, the applicant can request a “buy-up” to a 5 digit patient ZIP code instead of a 3 digit patient ZIP code. CHIA must review buy-up requests and may approve the request based on the project description. CHIA makes an additional set of core elements available only to government applicants. Government data applicants must specifically identify requested Government-Only elements in their application and provide justification for their request.

### Master Data Elements List

For the FY2020 HIDD, CHIA provides a master data elements list by table. Not every approved data applicant has access to every data element—some are reserved for limited dataset buy-ups or for approved government use. All approved data applicants have access to the “CORE” data. Data applicants who choose limited dataset buy-ups may receive access to some “LDS” elements. Only government data applicants may have access to the “GOV” fields. Data applicants interested in purchasing the data should visit the CHIA website for instructions.

**DISCHARGE TABLE—CORE ELEMENTS**

Note: Above are standard DRG fields. Depending on the type/version, some fields may be NULL/BLANK as they were not utilized for that type/version.

## Organization Table

The “Organization” table contains 1 record for every valid OrgId reported in the Discharge database. Referenced OrgIds include: IdOrgFiler, IdOrgHosp, IdOrgSite, and IdOrgTransfer data elements in the Discharge database. The OrgIds referenced in FY2020 HIDD are listed in Table 1.

**Table 1. ORGANIZATION IDENTIFICATION**

<b>Principal Data Element:</b>	ORGID FIELDS
<b>Other Data Elements:</b>	IdOrgFiler IdOrgHosp IdOrgSite IdOrgTransfer
<b>Rules:</b>	The Organization Table will contain 1 record for every valid OrgId reported in the Discharge database. The following table lists Hospitals only for submissions in a recent year.

Note: The organization table contains information on all organizations submitting data and other organizations transferring patients to organizations. Below is a list of the 77 organizations submitting inpatient data in FY2020.

ORGID	ORGANIZATION NAME
1	Anna Jaques Hospital
2	Athol Memorial Hospital
3	North Shore Medical Center – Union Campus
4	Baystate Medical Center
5	Baystate Franklin Medical Center
7	Berkshire Health System - Berkshire Campus
8	Fairview Hospital
10	Beth Israel Deaconess Medical Center - East Campus
16	Boston Medical Center
22	Brigham and Women's Hospital
25	Signature Healthcare - Brockton Hospital
27	Cambridge Health Alliance
39	Cape Cod Hospital
40	Falmouth Hospital
41	Steward - Norwood Hospital

ORGID	ORGANIZATION NAME
42	Steward - Carney Hospital
46	Children's Hospital Boston
49	MetroWest Medical Center - Framingham Campus
50	Cooley Dickinson Hospital
51	Dana-Farber Cancer Institute
53	Beth Israel Deaconess Hospital - Needham
57	Emerson Hospital
59	Brigham and Women's - Faulkner Hospital
62	Steward - Good Samaritan Medical Center - Brockton Campus
66	Melrose Wakefield Healthcare - Lawrence Memorial Hospital Campus
68	Harrington Memorial Hospital
71	Health Alliance Hospitals, Inc.
73	Heywood Hospital
75	Steward - Holy Family Hospital
77	Holyoke Medical Center
79	Beth Israel Deaconess – Plymouth (Jordan)
81	Lahey Clinic – Burlington Campus
83	Lawrence General Hospital
85	Lowell General Hospital – Main Campus
88	Martha's Vineyard Hospital
89	Massachusetts Eye and Ear Infirmary
91	Massachusetts General Hospital
97	Milford Regional Medical Center
98	Beth Israel Deaconess - Milton
99	Steward - Morton Hospital
100	Mount Auburn Hospital
101	Nantucket Cottage Hospital
103	New England Baptist Hospital

ORGID	ORGANIZATION NAME
104	Tufts-New England Medical Center
105	Newton-Wellesley Hospital
106	Baystate Noble Hospital
109	Lahey Health - Addison Gilbert Campus
110	Lahey Health - Beverly Campus
114	Steward - Saint Anne's Hospital
115	Lowell General - Saints Campus
116	North Shore Medical Center, Inc. - Salem Campus
118	Mercy Medical Center - Providence Behavioral Health Hospital Campus
119	Mercy Medical Center - Springfield Campus
122	South Shore Hospital
123	Southcoast Hospitals Group - Charlton Memorial Campus
124	Southcoast Hospitals Group - St. Luke's Campus
126	Steward - St. Elizabeth's Medical Center
127	Saint Vincent Hospital
129	Sturdy Memorial Hospital
130	UMass Memorial Medical Center - Memorial Campus
131	UMass Memorial Medical Center - University Campus
132	Health Alliance - Clinton Hospital
133	Marlborough Hospital
138	Lahey Winchester Hospital
139	Baystate Wing Memorial Hospital
141	Melrose-Wakefield Healthcare - Melrose-Wakefield Hospital Campus
142	Cambridge Health Alliance - Everett (Whidden) Hospital Campus
145	Southcoast Health- Tobey Campus
457	MetroWest Medical Center - Leonard Morse Campus
4448	Lahey Medical Center, Peabody
4460	Steward - Good Samaritan Medical Center - Norcap Lodge Campus

ORGID	ORGANIZATION NAME
6693	Shriners Hospital for Children – Boston
11466	Steward - Holy Family at Merrimack Valley
11467	Steward - Nashoba Valley Medical Center
11718	Shriner's Children's Hospital - Springfield
19835	UMass Memorial Field Hospital
19836	Boston Field Hospital

## Groupers

For data user convenience, CHIA performs data grouping using the 3M™ APR-DRG grouper and the CMS grouper. The All Patient Refined DRGs (3M APR-DRG) classifies patients into diagnostic groups based on severity of illness and risk of mortality to provide an accurate means of adjusting for hospital case mix differences for evaluating inpatient care across all hospitals. For FY2020 HIDD, CHIA has produced five versions of the Grouper: APR-DRG versions 20.0, 26.1, 30.0, 34.0, 36.0 and CMS version 37.2.

For the APR-DRG version 20.0, a discharge DRG, MDC, ROM and SOI are generated. For APR-DRG versions 26.1, 30.0, 34.0 and 36.0, both an admission and discharge DRG, MDC, ROM and SOI are generated. For the CMS DRG version 37.2, a discharge DRG and MDC are generated.

- The **Diagnosis Related Group (DRG)** places a patient into a clinically relevant medical category.
- The **Major Diagnostic Categories (MDC)** is a classification system that parses all principal diagnoses into one of 25 categories primarily for use with DRGs and reimbursement activity. Each category relates to a physical system, disease, or contributing health factor.
- **Risk of mortality (ROM)** is a clinical subclass indicating likelihood of dying. The ROM subclass data elements can be found in the ROM lookup table. In the APR-DRG system, a patient is assigned four distinct descriptors for ROM, numbered sequentially from 0 to 4. Researchers seeking to evaluate patient mortality, should use the 3M™ APR-DRGs in conjunction with the ROM subclass.
- **Severity of Illness (SOI)** relates to the extent of physiologic decompensation or systematic loss of organ function experienced by the patient. In the APR-DRG system, a patient is assigned four distinct descriptors for SOI, numbered sequentially from 0 to 4. The SOI subclass data elements can be found in the SOI lookup table. CHIA recommends that researchers seeking to evaluate resource use or establishing patient care guidelines use the 3M™ APR-DRGs in conjunction with SOI subclass.

Note: The 3M™ All Patient Refined DRG Software and its logic are proprietary to 3M Company and are subject to the terms and conditions of the software licensing agreement between 3M and Center for Health Information and Analysis.

## Organization of the Diagnosis and Procedure Codes

For FY2020, CHIA organized the procedure and diagnosis fields into three tables—Discharge, Diagnosis, and Procedure.

All secondary diagnosis and procedure codes are in the Diagnosis and Procedure tables, respectively. Indicator codes are available for each secondary diagnosis or procedure code and are based on the order in which those codes were sent to CHIA. In the indicator code field, an 'A' is used to designate admitting diagnosis and an indicator code of 'D' designates discharge diagnosis, all other diagnosis codes have an indicator of 'S' for secondary diagnosis. In the associated indicator code field, the admitting and discharge diagnosis have a code of '0' and secondary diagnosis have sequential numeric codes based on the order submitted. Discharges reached a maximum of 111 secondary diagnosis codes, and a maximum of 149 secondary procedure codes.

Diagnoses and procedures are ordered as submitted to CHIA. CHIA does not require the order of diagnoses and procedures to be medically relevant. CHIA does not affirm or confirm the medical relevancy of the principal diagnosis, procedure, or external cause codes reported in the discharge data.

## Organization Identifiers (OrgID)

FY2020 HIDD contains four organization identifier fields. These fields are a CHIA assigned unique code for each Massachusetts facility:

- **Massachusetts Filer Organization ID (IdOrgFiler):** The Organization ID for the facility that submitted the Inpatient discharge data to CHIA.
- **Massachusetts Site Organization ID (IdOrgSite):** The Organization ID for the site where the patient received Inpatient care.
- **Massachusetts Hospital Organization ID (IdOrgHosp):** The Organization ID for the main hospital affiliation. For example, 27(Cambridge Health Alliance) is the IdOrgHosp for the IdOrgSite 142 (Everett Hospital).
- **Massachusetts Transfer Hospital Organization ID (IdOrgTransfer):** The Organization ID for the facility from which a patient is transferred. If the patient is transferred from outside of Massachusetts, the IdOrgTransfer will be 9999999.

## Age LDS

If the date of birth and admission date are valid, then CHIA calculated Age LDS in years. The calculation was as follows:

- Age is calculated to be the rounded integer value – of the difference between Date of Birth and Discharge date.
- If Age is valid and < 1 year, then AgeLDS = 0.
- If Age is valid and > 0 and < 90 years, then AgeLDS = a year between 1 and 89
- If Age is valid and > 89 and <= 115, then AgeLDS = 999
- If Age is missing, negative value or value > 115, then AgeLDS = null

Discretion should be used whenever a questionable age assignment is noted. Researchers are advised to consider other data elements in their analysis of this field.

## Data Limitations

The HIDD is derived from patient discharge summaries, which can be traced to information entered by admitting and attending health professionals into the medical record. The quality of the HIDD is dependent upon facility data collection policies and coding practices of the medical record staff.

Information may not be entirely consistent from facility to facility due to differences in:

- Collection and verification of patient supplied information before or at admission,
- Medical record coding, consistency, and/or completeness,
- Extent of facility data processing capabilities,
- Flexibility of facility data processing systems,
- Capacity of financial processing system to record late occurring charges on CHIA's electronic submission,
- Non-comparability of data collection and reporting.

## Historical Data Elements

Users of multiple years of Case Mix data should be careful when merging multiple years of data. In order to maintain consistency across years, it may be necessary to merge some codes used for specific data elements. For example, keep in mind the transition from ICD-9-CM to ICD-10-CM/PCS which began in FY2015 (October 2015) and the change in race/ethnicity coding rubric which began in FY2007 (October 2007). Users with questions about new data elements or changes in coding from year to year should contact CHIA at [CaseMix.data@state.ma.us](mailto:CaseMix.data@state.ma.us).

## Data Dictionary

FY2020 HIDD data dictionary provides metadata for the following attributes:

- *Data Element*: name as it appears in the file
- *Short description*: to help users understand what the element contains
- *Primary table*: the main table (MS ACCESS) or file (SAS) that the data element will appear in
- *Linking tables*: other tables that contain the data element
- *Availability to users*: indicates if the data is available to all users (“CORE”), a buy-up (“LDS”), or available only to government “Government”
- *Type of Data*: describes if the data element is Categorical, Ordinal, an Identifier, Continuous, Date/Time, or Open Text
- *Format*: indicates if the data is formatted in a specific fashion
- *CHIA derived or calculated*: indicates if the field was created by CHIA
- *Reference table*: indicates if a Categorical data element has set of valid values that are associated with other information
- *Description*: is a longer explanation of the data element and its limitations
- *Summary statistics*: links to frequencies or means for that data element

Users of the data with questions about any specific data element should contact CHIA at [CaseMix.data@state.ma.us](mailto:CaseMix.data@state.ma.us).

### AccommodationsID

<b>Short Description</b>	CHIA created field.
<b>Primary Table:</b>	Service
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Identifier
<b>CHIA Derived:</b>	No

<b>CHIA Derived:</b>	No

**Description:** A standardized category of the patient's status upon admission to the hospital.

**Reference Table:** Yes

CODE	DESCRIPTION
1	Emergency
2	Urgent
3	Elective
4	Newborn
5	Information Unavailable

**Summary Statistics:** AdmissionType Frequency

### AdmissionYear

**Short Description** Year in which patient was admitted to hospital.

**Primary Table:** Discharge

**Linking Tables:**

**Availability to Users:** CORE

**Type of Data:** Date

**CHIA Derived:** No

**Description:** Year in which patient was admitted to hospital derived by CHIA from the Admission Date.

**Reference Table:** No

### ADM\_DRG (APR261, APR300, APR340, APR360)

**Short Description** Admitting diagnosis related group.

**Primary Table:** Grouper – APR 261, Grouper – APR 300, Grouper – APR 340, Grouper – APR 360

**Linking Tables:** Discharge

**Availability to Users:** CORE

**Type of Data:** Categorical

**Format:** VARCHAR (NNN)

**Length:** 3

**CHIA Derived:**

**Description:** Standard DRG based on admission diagnoses.

**Reference Table:** Standard 3M Grouper Values

**ADM\_MDC (APR261, APR300, APR340, APR360)**

<b>Short Description</b>	Admitting major diagnostic category.
<b>Primary Table:</b>	Grouper – APR 261, Grouper – APR 300, Grouper – APR 340, Grouper – APR 360
<b>Linking Tables:</b>	Discharge
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR (NN)
<b>Length:</b>	2
<b>CHIA Derived:</b>	
<b>Description:</b>	Admission MDC should classify the patient, based on Admission diagnoses and procedures, into a standard major diagnostic group.
<b>Reference Table:</b>	Standard 3M Grouper Values

**ADM\_RCD (APR261, APR300, APR340, APR360)**

<b>Short Description</b>	Null grouper field.
<b>Primary Table:</b>	Grouper – APR 261, Grouper – APR 300, Grouper – APR 340, Grouper – APR 360
<b>Linking Tables:</b>	Discharge
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR (NN)
<b>Length:</b>	2
<b>CHIA Derived:</b>	
<b>Description:</b>	DRG record error indicator, '00' indicates valid DRG
<b>Reference Table:</b>	

**ADM\_ROM (APR261, APR300, APR340, APR260)**

<b>Short Description</b>	Admitting risk of mortality.
<b>Primary Table:</b>	Grouper – APR 261, Grouper – APR 300, Grouper – APR 340, Grouper 360
<b>Linking Tables:</b>	Discharge
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR (N)
<b>Length:</b>	1
<b>CHIA Derived:</b>	
<b>Description:</b>	Admitting ROM should classify the patient, based on admitting diagnoses and procedures, into a standard category of clinical risk.
<b>Reference Table:</b>	Standard 3M Grouper Values

### ADM\_SOI (APR261, APR300, APR340, APR360)

<b>Short Description</b>	Admitting severity of illness.
<b>Primary Table:</b>	Grouper – APR 261, Grouper – APR 300, Grouper – APR 340, Grouper - APR 360
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR (N)
<b>Length:</b>	1
<b>CHIA Derived:</b>	
<b>Description:</b>	Admitting SOI should classify the patient, based on admitting diagnoses and procedures, into a standard category of illness severity.
<b>Reference Table:</b>	Standard 3M Grouper Values

### AgeLDS

<b>Short Description</b>	Age of the patient.
<b>Primary Table:</b>	Discharge
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Continuous
<b>Format:</b>	Integer
<b>Length:</b>	3
<b>CHIA Derived:</b>	Yes
<b>Description:</b>	Age of the patient as calculated by CHIA. Rounded up to the nearest integer. Age is zero when patient is younger than 1 year and age is 999 when patient is older than 89 years. Discretion should be used whenever a questionable age assignment is noted. Researchers are advised to consider other data elements in their analysis of this field.
<b>Reference Table:</b>	No
<b>Summary Statistics:</b>	AgeLDS Mean

### AncillaryID

<b>Short Description</b>	CHIA created field.
<b>Primary Table:</b>	Service
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Identifier
<b>Format:</b>	Integer
<b>Length:</b>	
<b>CHIA Derived:</b>	No
<b>Description:</b>	

**Reference Table:** No

### AttendingPhysicianNumber

**Short Description** ID of the Attending physician.

**Primary Table:** Discharge

**Linking Tables:**

**Availability to Users:** LDS

**Type of Data:** Identifier

**Format:** VARCHAR

**Length:** 6

**CHIA Derived:** No

**Description:**

**Reference Table:** No

### Birthweight

**Short Description** The specific birth weight of the newborn recorded in grams.

**Primary Table:** Discharge

**Linking Tables:**

**Availability to Users:** CORE

**Type of Data:** Continuous

**Format:** Integer

**Length:** 4

**CHIA Derived:** No

**Description:** Must be present if type of admission is 'newborn'

**Reference Table:** No

### ClaimCertificateRID

**Short Description** Medicaid Recipient Identification Number.

**Primary Table:** Discharge

**Linking Tables:**

**Availability to Users:** GOV-SPEC

**Type of Data:** Date

**Format:** Text

**Length:** 12

**CHIA Derived:** No

**Description:**

**Reference Table:** No

### CMS372\_DIS\_DRG

<b>Short Description</b>	CMS 37.2 Grouper - Discharge diagnosis related group
<b>Primary Table:</b>	Grouper – CMS
<b>Linking Tables:</b>	Discharge
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR(NNN)
<b>Length:</b>	3
<b>CHIA Derived:</b>	
<b>Description:</b>	Discharge DRG should classify the patient, based on discharge diagnoses and procedures, into a standard major diagnostic group.
<b>Reference Table:</b>	Standard 3M Grouper Values

### CMS372\_DIS\_MDC

<b>Short Description</b>	CMS 37.2 Grouper - Discharge major diagnostic category
<b>Primary Table:</b>	Grouper – CMS
<b>Linking Tables:</b>	Discharge
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR (NN)
<b>Length:</b>	2
<b>CHIA Derived:</b>	
<b>Description:</b>	Discharge MDC should classify the patient, based on discharge diagnoses and procedures, into a standard major diagnostic group.
<b>Reference Table:</b>	Standard 3M Grouper Values

### ConditionPresent

<b>Short Description</b>	Flags whether the diagnosis was present on admission.
<b>Primary Table:</b>	Diagnosis
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR
<b>Length:</b>	1
<b>CHIA Derived:</b>	No
<b>Description:</b>	Indicates the onset of a diagnosis preceded or followed by admission. There is a POA indicator for every diagnosis and external cause-code.
<b>Reference Table:</b>	Condition Present

### ConditionPresentECode

<b>Short Description</b>	Flags whether the external cause-code was present on admission.
<b>Primary Table:</b>	Diagnosis
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR
<b>Length:</b>	1
<b>CHIA Derived:</b>	No
<b>Description:</b>	Indicates the onset of a diagnosis preceded or followed by admission. There is a POA indicator for every diagnosis and external cause-code.
<b>Reference Table:</b>	Condition Present

### DaysBetweenStays

<b>Short Description</b>	Count of stays between admissions.
<b>Primary Table:</b>	Diagnosis
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Continuous
<b>Format:</b>	Integer
<b>Length:</b>	4
<b>CHIA Derived:</b>	
<b>Description:</b>	This CHIA calculated field indicates the number of days between each admission and each consecutive admission for applicable patients. That is, a match with the UHIN only is used to make a determination that a patient has been readmitted.
<b>Reference Table:</b>	No

### DHCFPSubmissionFile

<b>Short Description</b>	CHIA created field
<b>Primary Table:</b>	SubmissionLog
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Identifier
<b>Format:</b>	VARCHAR
<b>Length:</b>	
<b>CHIA Derived:</b>	No
<b>Description:</b>	
<b>Reference Table:</b>	No

### DiagnosisCode

<b>Short Description</b>	ICD-10-CM code for each diagnosis reported by the facility.
<b>Primary Table:</b>	Diagnosis
<b>Linking Tables:</b>	Discharge
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR
<b>Length:</b>	7
<b>CHIA Derived:</b>	No
<b>Description:</b>	ICD-10-CM Associated Diagnosis. Excludes the decimal point. May be an External Cause Code or an Associated or Supplemental External Cause Code IF the Principal External Cause Code is present. Associated External Cause Codes may be: ICD-10-CM (V00-Y84.9) and supplemental codes: (Y90-Y99) (place of injury, activity, status).
<b>Reference Table:</b>	Standard ICD-9-CM or ICD-10-CM Diagnosis Codes

### DiagnosisTable

<b>Short Description</b>	Indicates the order in which facilities submitted Diagnosis Codes.
<b>Primary Table:</b>	Diagnosis Code
<b>Linking Tables:</b>	Discharge
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Continuous
<b>Format:</b>	Integer
<b>Length:</b>	3
<b>CHIA Derived:</b>	No
<b>Description:</b>	Order in which diagnosis code was submitted to CHIA.
<b>Reference Table:</b>	No

### DIS\_DRG (APR200, APR261, APR300, APR340, APR360)

<b>Short Description</b>	Discharge diagnosis related group.
<b>Primary Table:</b>	Grouper – APR 200, Grouper – APR 261, Grouper – APR 300, Grouper – APR 340, Grouper – APR 360
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR (NNN)
<b>Length:</b>	3
<b>CHIA Derived:</b>	
<b>Description:</b>	Standard DRG based on Discharge diagnoses.
<b>Reference Table:</b>	Standard 3M Grouper Values

**DIS\_MDC (APR200, APR261, APR300, APR340, APR360)**

<b>Short Description</b>	Discharge major diagnostic category.
<b>Primary Table:</b>	Grouper – APR 200, Grouper – APR 261, Grouper – APR 300, Grouper – APR 340, Grouper - APR 360
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR (NN)
<b>Length:</b>	2
<b>CHIA Derived:</b>	
<b>Description:</b>	Discharge MDC should classify the patient, based on Discharge diagnoses and procedures, into a standard major diagnostic group.
<b>Reference Table:</b>	Standard 3M Grouper Values

**DIS\_RCD (APR200, APR261, APR300, APR340, APR360)**

<b>Short Description</b>	Null grouper field.
<b>Primary Table:</b>	Grouper – APR 200, Grouper – APR 261, Grouper – APR 300, Grouper – APR 340, Grouper - APR360
<b>Linking Tables:</b>	Discharge
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR (NN)
<b>Length:</b>	2
<b>CHIA Derived:</b>	
<b>Description:</b>	DRG record error indicator, '00' indicates valid DRG
<b>Reference Table:</b>	

**DIS\_ROM (APR200, APR261, APR300, APR340, APR360)**

<b>Short Description</b>	Discharge risk of mortality
<b>Primary Table:</b>	Grouper – APR 200, Grouper – APR 261, Grouper – APR 300, Grouper – APR 340, Grouper - APR 360
<b>Linking Tables:</b>	Discharge
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR(N)
<b>Length:</b>	1
<b>CHIA Derived:</b>	
<b>Description:</b>	Discharge ROM should classify the patient, based on discharge diagnoses and procedures, into a standard category of mortality risk.
<b>Reference Table:</b>	Standard 3M Grouper Values

### DIS\_SOI (APR200, APR261, APR300, APR340, APR360)

<b>Short Description</b>	Discharge severity of illness.
<b>Primary Table:</b>	Grouper – APR 200, Grouper – APR 261, Grouper – APR 300, Grouper – APR 340, Grouper - APR360
<b>Linking Tables:</b>	Discharge
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR
<b>Length:</b>	1
<b>CHIA Derived:</b>	
<b>Description:</b>	Discharge SOI should classify the patient, based on discharge diagnoses and procedures, into a standard category of illness severity.
<b>Reference Table:</b>	Standard 3M Grouper Values

### DischargeDate

<b>Short Description</b>	The date the patient was discharged from inpatient status in the hospital for this episode of care.
<b>Primary Table:</b>	Discharge
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	LDS
<b>Type of Data:</b>	Date
<b>Format:</b>	YYYYMMDD
<b>Length:</b>	8
<b>CHIA Derived:</b>	No
<b>Description:</b>	Calendar date of discharge from inpatient status.
<b>Reference Table:</b>	No

### DischargeDayOfWeek

<b>Short Description</b>	Day of the month on which the patient was discharged from inpatient status.
<b>Primary Table:</b>	Discharge
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Date
<b>Format:</b>	VARCHAR
<b>Length:</b>	3
<b>CHIA Derived:</b>	No
<b>Description:</b>	Calendar day of discharge from inpatient status. Sun, Mon, Tue, Wed, Thu, Fri, Sat
<b>Reference Table:</b>	No

### DischargeMonth

<b>Short Description</b>	Month in which patient was discharged from Inpatient status.
<b>Primary Table:</b>	Discharge
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	LDS
<b>Type of Data:</b>	Date
<b>Format:</b>	YYYYMM
<b>Length:</b>	6
<b>CHIA Derived:</b>	No
<b>Description:</b>	Year and Month of discharge from inpatient status.
<b>Reference Table:</b>	No

### DischargePassed

<b>Short Description</b>	CHIA derived field
<b>Primary Table:</b>	Discharge
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR
<b>Length:</b>	1
<b>CHIA Derived:</b>	No
<b>Description:</b>	
<b>Reference Table:</b>	No

### DischargeYear

<b>Short Description</b>	Year in which patient was discharged from hospital.
<b>Primary Table:</b>	Discharge
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Date
<b>Format:</b>	YYYY
<b>Length:</b>	4
<b>CHIA Derived:</b>	No
<b>Description:</b>	
<b>Reference Table:</b>	No

## DNRStatus

<b>Short Description</b>	Indicates whether there is an order not to resuscitate the patient.
<b>Primary Table:</b>	Discharge
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	GOV
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR
<b>Length:</b>	1
<b>CHIA Derived:</b>	
<b>Description:</b>	A status indicating that the patient had a physician order not to resuscitate or the patient had a status of receiving palliative care only. Do not resuscitate status means not to revive from potential or apparent death or that a patient was being treated with comfort measures only.

### Reference Table:

CODE	DESCRIPTION
1	DNR order written
2	Comfort measures only
3	No DNR order or measures ordered

### Summary Statistics:

DNRStatus Frequency

## Ecode

<b>Short Description</b>	ICD-10-CM External Cause code.
<b>Primary Table:</b>	Discharge
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR
<b>Length:</b>	7
<b>CHIA Derived:</b>	No
<b>Description:</b>	International Classification of Diseases, 10th Revision, Clinical Modification (ICD) V-codes, and or W-codes, X-codes, or Y-codes (V00-Y99) are used to categorize events and conditions describing the external cause of injuries, poisonings, and adverse effects. Codes adequate to describe the external cause are reported for discharges with a principal and/or other diagnoses classified as injuries or poisonings of the ICD-10-CM (S00-T88) or where the ICD-10-CM codes demonstrate that an additional E-code is appropriate. The principal external cause of injury code shall describe the mechanism that caused the most severe injury, poisoning, or adverse effect. Additional codes used to report place of occurrence or to completely describe the mechanism(s) that contributed to the injury or poisoning or the causal

circumstances surrounding any injury or poisoning are reported in the Diagnosis table. This data element describes the principal external cause of injuries, poisonings, and adverse effects using ICD-9-CM codes. In addition to the dedicated E-Code field, facilities record additional E-Codes in the associated diagnosis fields for conditions having multiple causes.

**Reference Table:** Standard ICD-9-CM or ICD-10-CM Diagnosis Codes

### EDFlagCode

**Short Description:** Indicates if inpatient admission began in the hospital's emergency department.  
**Primary Table:** Discharge  
**Linking Tables:**  
**Availability to Users:** CORE  
**Type of Data:** Categorical  
**Format:** VARCHAR (N)  
**Length:** 1  
**CHIA Derived:** No  
**Description:** Indicates if inpatient admission began in the hospital's emergency department.  
**Reference Table:**

CODE	DESCRIPTION
0	Not admitted from the ED, no ED visit reflected in this record
1	Not admitted from the ED, but ED visit(s) reflected in this record
2	Admitted from the ED

**Summary Statistics:** EDFlagCode Frequency

### EmergencyDepartmentRegistrationDate

<b>Description:</b>	
<b>Reference Table:</b>	No

### MedicalRecordNumber

<b>Short Description</b>	Admission identifier assigned by the facility
<b>Primary Table:</b>	Discharge
<b>Linking Tables:</b>	

<b>Availability to Users:</b>	GOV-SPEC
<b>Type of Data:</b>	Identifier
<b>Format:</b>	VARCHAR
<b>Length:</b>	10
<b>CHIA Derived:</b>	No
<b>Description:</b>	The unique number assigned to each patient within the hospital that distinguishes the patient and the patient's hospital record(s) from all others in that institution.
<b>Reference Table:</b>	No

### MotherMedicalRecordNumber

<b>Short Description</b>	Patient's mother's unique hospital assigned identifier
<b>Primary Table:</b>	Discharge
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	GOV-SPEC
<b>Type of Data:</b>	Identifier
<b>Format:</b>	VARCHAR
<b>Length:</b>	10
<b>CHIA Derived:</b>	No
<b>Description:</b>	The medical record number assigned within the hospital to the newborn's mother is to be reported for the newborn. The medical record number of the newborn's mother distinguishes the patient's mother and the patient's mother's hospital record(s) from all others in that institution.
<b>Reference Table:</b>	No

### MothersUHIN

<b>Short Description</b>	Patient's mother's unique ID.
<b>Primary Table:</b>	Discharge
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	LDS
<b>Type of Data:</b>	Identifier
<b>Format:</b>	VARCHAR
<b>Length:</b>	9
<b>CHIA Derived:</b>	No
<b>Description:</b>	CHIA generated unique identifier of a newborn's mother. For newborns or for infants less than 1 year old, CHIA derives a unique ID for the patient's mother. This unique ID allows a newborn visit to be associated with a Mother's visit. Linkable across records and fiscal years. Each patient is given by CHIA a Unique Health Information Number (UHIN), which is a surrogate key that can link patients over time and across facilities. The data element is blank, a single dash (-) appears in the UHIN field. It is valid for facilities to report that the unique patient identifier is unknown. In these

cases, the UHIN appears as '000000001'. The utility of the UHIN field is dependent on the reporting data. For a small number of facilities, little or no UHIN data exists, as these institutions failed to report patients' uniquely identified information. Other facilities reported the same data repeatedly, resulting in numerous admissions for one UHIN. In other cases, the demographic information (age, sex, etc.) was not consistent when a match did exist with the UHIN. Some explanations for this include assignment of a mother's unique identifiers to her infant or assignment of a spouse's unique identifiers to a patient. Invalid data uses the code UHIN="4".

**Reference Table:** No

### **NewBornAge**

**Short Description:** Newborn's age in weeks at admission  
**Primary Table:** Discharge

<b>Type of Data:</b>	Categorical
<b>Format:</b>	VARCHAR (NNNNN)
<b>Length:</b>	5
<b>CHIA Derived:</b>	
<b>Description:</b>	ZIP Code of patient's temporary Massachusetts address. CHIA does not alter or standardize the values in this field.

**Reference Table:** No

### TemporaryUSPatientStreetAddress

**Short Description:** Patient's street address  
**Primary Table:** Discharge  
**Linking Tables:**  
**Availability to Users:** GOV-SPEC  
**Type of Data:** Open Text  
**Format:** VARCHAR  
**Length:** 30  
**CHIA Derived:** No  
**Description:** Address for patient's temporary, Massachusetts-based, residence as provided by the hospital. CHIA does not alter or standardize this field  
**Reference Table:** No

### TotalCharges

**Short Description:** Total inpatient charges included with a Facility-Submission-Quarter.  
**Primary Table:** Service  
**Linking Tables:** Service  
 SubmissionLog  
**Availability to Users:** CORE  
**Type of Data:** Continuous  
**Format:** Integer  
**Length:** 8  
**CHIA Derived:** No  
**Description:** Sum of charges for the inpatient stay.  
**Reference Table:** No

### TotalChargesAll

**Short Description:** Hospital charges (all)  
**Primary Table:** Discharge  
**Linking Tables:**  
**Availability to Users:** CORE  
**Type of Data:** Continuous  
**Format:** Integer  
**Length:** 8  
**CHIA Derived:** No  
**Description:** The full, undiscounted charges summarized by specific accommodation revenue code(s). Total charges should not include charges for telephone service, television or

private duty nurses. Any charges for a leave of absence period are to be included in the routine accommodation charges for the appropriate service (medical/surgical, psychiatry) from which the patient took the leave of absence. Any other routine admission charges or daily charges under which expenses are allocated to the routine or special care reporting centers on the CHIA-403 must be included in the total charges. This is the grand total of charges associated with the patient's inpatient stay. The total charge amount should be rounded to the nearest dollar. A charge of \$0 is not permitted unless the patient has a special Departure Status.

**Reference Table:** No

### TotalChargesAncillaries

**Short Description** Hospital ancillary charges  
**Primary Table:** Discharge  
**Linking Tables:**  
**Availability to Users:** CORE

<b>Primary Table:</b>	SubmissionLog
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	CORE
<b>Type of Data:</b>	Identifier
<b>Format:</b>	Integer
<b>Length:</b>	5
<b>CHIA Derived:</b>	No
<b>Description:</b>	
<b>Reference Table:</b>	No

### UHIN

<b>Short Description</b>	Unique patient id created by CHIA.
<b>Primary Table:</b>	Discharge
<b>Linking Tables:</b>	
<b>Availability to Users:</b>	LDS
<b>Type of Data:</b>	Identifier
<b>Format:</b>	VARCHAR
<b>Length:</b>	9
<b>CHIA Derived:</b>	No
<b>Description:</b>	CHIA generated unique identifier of the patient. Linkable across records and fiscal years. Each patient is given by CHIA a Unique Health Information Number (UHIN), which is a surrogate key that can link patients over time and across facilities. The data element is blank, a single dash (-) appears in the UHIN field. It is valid for facilities to report that the unique patient identifier is unknown. In these cases, the UHIN appears as '000000001'. The utility of the UHIN field is dependent on the

reporting data. For a small number of facilities, little or no UHIN data exists, as these institutions failed to report patients' uniquely identified information. Other facilities reported the same data repeatedly, resulting in numerous admissions for one UHIN. In other cases, the demographic information (age, sex, etc.) was not consistent when a match did exist with the UHIN. Some explanations for this include assignment of a mother's unique identifiers to her infant or assignment of a spouse's unique identifiers to a patient. Invalid data uses the code UHIN="4".

**Reference Table:** No

### UHIN\_SequenceNo

**Short Description** Order of hospital discharges for a patient.

**Primary Table:** Discharge

**Linking Tables:**

**Availability to Users:** LDS

**Type of Data:** Continuous

**Format:** VARCHAR

**Length:** 3

**CHIA Derived:** Yes

**Description:** This calculated field indicates the chronological order of Inpatient discharge for patients with multiple Inpatient discharges in a fiscal year. A match with the UHIN only, is used to make the determination that a patient has had multiple discharges. The Sequence Number uses the following data conventions: (1) The sequence number is calculated by sorting the file by UHIN and discharge date (in ascending order). (2) The sequence number is then calculated by incrementing a counter for each UHIN's set of discharges. A sequence number of "1" indicates the first discharge for the UHIN in that fiscal year. (3) If a UHIN has two visits on the same day, the visit date is used as the secondary sort key. (4) If the UHIN is undefined (not reported, unknown or invalid), the sequence number is set to zero.

**Reference Table:** No

### UnitsOfService

**Short Description** Number of days with an Accommodation charge

**Primary Table:** Service

**Linking Tables:** Service

**Availability to Users:** CORE

**Type of Data:** Continuous

**Format:** Integer

### Year

**Short Description:** Indicates Fiscal Year of submission.  
**Primary Table:** Discharge  
**Linking Tables:** Service  
 SubmissionLog  
**Availability to Users:** CORE  
**Type of Data:** Date  
**Format:** YYYY  
**Length:** 4  
**CHIA Derived:** No  
**Description:** Fiscal Year the data was submitted.  
**Reference Table:** No

## Longer Reference Tables

FY2020 HIDD has 20 standard reference tables. These relate to categorical variables that are driven by the *Hospital Inpatient Discharge Database October 2019 Submission Guide*. Some of the tables have been integrated into the data dictionary. This section contains longer tables used by multiple data elements. Users of the data with additional questions about any specific Reference table should contact CHIA at [CaseMix.data@state.ma.us](mailto:CaseMix.data@state.ma.us).

NH	New Hampshire
NY	New York
RI	Rhode Island
VT	Vermont

Note: The LDS includes only the states listed above. The default code of XX is used for any other state or U.S. possession.

## Part D. Data Notes

At the time of this publication the following data notes were present from resubmissions that were available in the June 2021 release of FY 2020 HIDD. As data findings occur, CHIA will update the FY20 HIDD Release Notes published on the CHIA website at <https://www.chiamass.gov/case-mix-data/>.

- North Shore Medical Center – Union Hospital Campus (Org Id 3) permanently closed on November 3, 2019. Union Hospital based services were consolidated to the North Shore Medical Center - Salem Hospital facility (Org Id 116). HIDD was only reported for the applicable FY20 Quarter 1 timeframe.
- Steward Norwood Hospital (Org Id 41) temporarily closed on June 29, 2020 due to flooding. HIDD was not reported for FY20 Quarter 4.
- Mass General Brigham Hospitals incorrectly coded the Payer Type on some discharges in FY20. This finding was discovered too late to correct with data resubmissions. The error reversed Health Safety Net as the primary payer and Medicaid as the secondary payer.

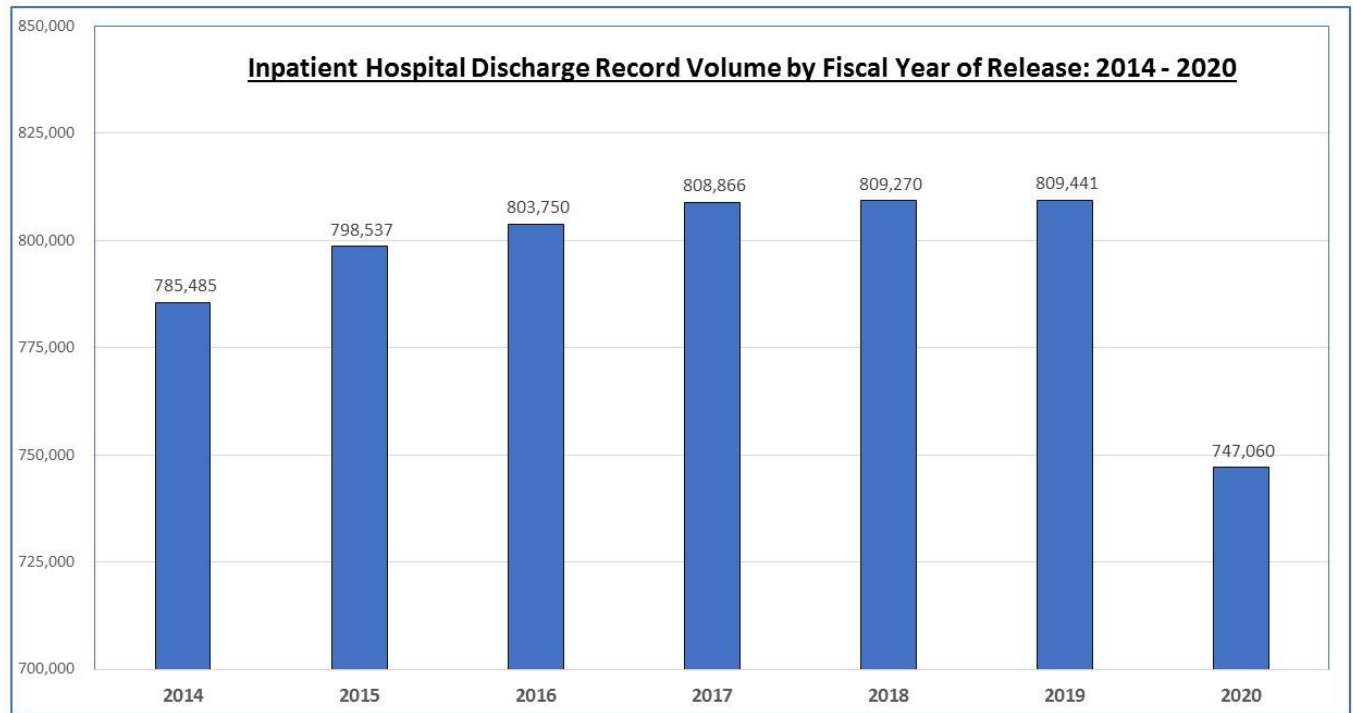

### Updates since the FY 2020 HIDD Interim data release include:

- Beth Israel Deaconess Hospitals – Milton (Org Id 98), Needham (Org Id 53) and Plymouth (Org Id 79) corrected entries to Source of Admission for all quarters of FY20. Due to a mapping issue, admissions transferred from within the hospital ER were incorrectly categorized as directly referred to inpatient status by a Physician. The data was resubmitted with corrections for the Final HIDD release.
- MetroWest Medical Center (Org Id 49) and Saint Vincent Hospital (Org Id 27) corrected entries to Source of Admission for all quarters of FY20. Due to a mapping issue, admissions transferred from within the hospital ER were incorrectly categorized as directly referred to inpatient status by a Physician or Walk in/Self Referral. The data was resubmitted with corrections for the Final HIDD release.
- MetroWest Medical Center (Org Id 49) corrected entries to Hospital Service Site for all quarters of FY20 to identify discharges from their Leonard Morse Hospital Campus (Org Id 457).
- Cambridge Health Alliance – Cambridge Hospital (Org Id 27) and Everett Hospital (Org Id 142) corrected entries to Payer Type for all quarters of FY20.

Prior to releasing the Final FY2020 HIDD, CHIA provides the hospitals with a profile of the data submitted. Providers may resubmit data or may provide written feedback to CHIA. Below is a summary of some of the key feedback received:

- Southcoast Hospitals Group – Charlton Memorial Campus (Org Id 123), St. Luke's Campus (Org Id 124) and Tobey Campus (Org Id 145):
  - Noted the validation reports for Source of Admission, Hispanic Indicator, ED Registration time and ED Registered Day of the Week do not reflect internal hospital records.
- Saint Vincent Hospital (Org Id 127):
  - Noted the Source of Admission validation report needs further review to ensure accuracy. The reported data passed validation thresholds.

The Final FY2020 HIDD release contains a lower volume of visit records than previous years.

Data users should update their ICD-10-CM/PCS lookup tables to include new FY2020 diagnosis codes downloadable from CMS at: <https://www.cms.gov/Medicare/Coding/ICD10/2020-ICD-10-CM>

The Final FY 2020 HIDD release contains ICD-10-CM U-codes not used in previous years.

**HIDD Record Volume Frequency by ICD-10-CM Major Diagnosis Categories for FY2018 to FY2020**
