Fiscal Year: 2007

Outpatient Hospital Observation Database Documentation Manual

DATE ISSUED: JUNE 2009

General Documentation

FY2007 Outpatient Hospital Observation Database

INTRODUCTION

This documentation manual consists of two sections; General Documentation and Technical Documentation. This documentation manual is for use with the Outpatient Hospital Observation Database for FY2007(also referred to in this manual as OOA)

Section I. General Documentation

The General Documentation section includes background on the development of the FY2007 Outpatient Hospital Observation Database, and is intended to provide users with an understanding of the data quality issues connected with the data elements they may decide to examine. This section also contains hospital-reported discrepancies received in response to the data verification process, and supplementary information, including a table of data field names and descriptions, a list of Type A and Type B errors, and a list of hospitals within the database.

Please note that major changes to the data base went into effect beginning October 1, 2006. Implementation of the changes occurred in two phases. Changes to the record layout only began on October 1, 2006, for Quarter 1. Error edits for the new fields began on January 1, 2007, for Quarter 2. The January, February and March data submissions were processed with edits that counted toward submission pass/fail.

Section II. Technical Documentation

The Technical Documentation Section includes information on the fields calculated by the Division of Health Care Finance & Policy (DHCFP), and a data file summary section describing the data that is contained in the file.

Please note that significant changes have been made to the Discharge File Table for 2007. New fields and values have been added. Please see the new Discharge File Table in Part B. of the Technical Documentation section.

For your reference, DVD Specifications are listed in the following section to provide the necessary information to enable users to access files.

Regulations:

Copies of Regulation 114.1 CMR 17.00: Requirement for the Submission of Hospital Case Mix and Charge Data and Regulation 114.1 CMR 2.00: Disclosure of Hospital Case Mix and Charge Data may be obtained for a fee by faxing a request to the Division at 617-727-7662, or by emailing a request to the Division at:

Public.Records@state.ma.us. The Regulations also may be found at the Division's website:

http://www.mass.gov/dhcf

DVD File Specifications

1. Hardware Requirements

*DVD ROM Device

*Hard Drive with 1.60 GB of space available

2. DVD Contents

This DVD contains the Final/Full Year 2007 Outpatient Hospital Observation Data Product. It contains two Microsoft Access (MDB) files.

As an approved applicant, or its agent, you are reminded that you are bound by your application and confidentiality agreement to secure this data in a sufficient manner, so as to protect the confidentiality of the data subjects.

3. File Naming Conventions

OA07L#Q1
OA07L#Q2
Where '#' stands for the level of data requested
OA07L#Q3
OA07L#Q4

PART A. BACKGROUND INFORMATION

1. GENERAL DOCUMENTATION OVERVIEW

The General Documentation consists of six sections.

PART A. BACKGROUND INFORMATION:

Provides a general documentation overview, description of quarterly reporting periods, and information on the development of the Outpatient Hospital Observation Database.

PART B. DATA:

Describes the basic data quality standards as contained in Regulation 114.1 CMR 17.00: Requirement for the Submission of Hospital Case Mix and Charge Data, some general definitions, general data caveats, and information on specific data elements. To ensure that the database is as accurate as possible, the Division strongly encourages hospitals to verify the accuracy of their data as it appears on the Outpatient Hospital Observation Database Verification Report, or to indicate that the hospital found discrepancies in its data. If a hospital finds data discrepancies, the Division requests that the hospital submit written corrections that provide an accurate profile of that hospital's observation stays.

PART C. HOSPITAL RESPONSES:

Details hospital responses received as a result of the data verification process. From this section, users can also learn which hospitals did not verify their data. This section contains the following lists and charts:

- 1. Summary of Hospital's OOA Verification Report Responses
- 2. List of Error Categories
- 3. Summary of Reported Discrepancies by Category
- 4. Index of Hospitals Reporting Discrepancies
- 5. Individual Hospital Discrepancy Documentation

PART D. CAUTIONARY USE HOSPITALS:

Lists the hospitals for which the Division did not receive four (4) quarters of acceptable Outpatient Hospital Observation Data, as specified under Regulation 114.1 CMR 17.00.

PART E. HOSPITALS SUBMITTING DATA:

Lists all hospitals submitting OOA data and those that failed to provide data. Also lists hospital discharge and charge totals by quarter for hospitals submitting data.

PART F. SUPPLEMENTARY INFORMATION:

Contains data element names, descriptions, and types of errors, hospital addresses, and identication numbers, as specificed in:

Regulation 114.1 CMR 17.08: Outpatient Observation Data Specifications.

Part A. BACKGROUND INFORMATION

2. Definition of Quarterly Reporting Periods

All Massachusetts acute care hospitals are required to file data which describes the case mix of their patients as well as the charges for services provided to their patients in accordance with Regulation 114.1 CMR 17.00. Hospitals report data to the Division on a quarterly basis. These quarterly reporting intervals were as follows:

Quarter 1: October 1, 2006 - December 31, 2006

Quarter 2: January 1, 2007 - March 31, 2007

Quarter 3: April 1, 2007 - June 30, 2007

Quarter 4: July 1, 2006 - September 30, 2007

PART A. BACKGROUND INFORMATION

3. Development of the Outpatient Hospital Observation Database

The Massachusetts Division of Health Care Finance and Policy began collecting Outpatient Observation Data in July, 1997. The Division's collection of Outpatient Observation Data was in response to increasing migration of hospital care to the outpatient observation setting from the traditional inpatient setting. Outpatient Observation patients are observed, evaluated, and treated, if necessary, before they are safely discharged from the hospital.

The Outpatient Observation Data includes patients who receive outpatient observation services and are not admitted to the hospital. Outpatient Observation services is defined generally for reporting purposes in the Case Mix Regulation 114.1 CMR 17.00 as:

Observation services are those furnished on a hospital's premises which are reasonable and necessary to further evaluate the patient's condition and provide treatment to determine the need for possible admission to the hospital. These services include the use of a bed and periodic monitoring by a hospital's physician, nursing, and other staff.

PART A. BACKGROUND INFORMATION

3. Development of the Outpatient Hospital Observation Database

Description of the Data Levels I - VI

Six data levels have been created to correspond to the levels in Regulation 114.5 CMR 2.00; "Disclosure of Hospital Case Mix and Charge Data". Higher levels contain an increasing number of the data elements defined as "Deniable Data Elements" in Regulation 114.5 CMR 2.00. The deniable data elements include: the Unique Health Identification Number (UHIN, which is the encrypted patient social security number), the patient medical record number, hospital billing number, Mother's UHIN, date of birth, beginning and ending dates of service, the Unique Physician Number (UPN, which is the encrypted Massachusetts Board of Registration in Medicine License Number), and procedure dates.

The six levels include:

LEVEL I: Contains all case mix data elements, except the deniable data elements

LEVEL II: Contains all Level I data elements, plus the UPN

LEVEL III: Contains all Level I data elements, plus the patient UHIN, the mother's UHIN, an observation sequence number for each UHIN observation record, and may include the number of days between each subsequent observation stay for each UHIN number.

LEVEL IV: Contains all Level I data elements, plus the patient UHIN, the mother's UHIN, the UPN, an observation sequence number for each UHIN observation record, and may include the number of days between each subsequent observation stay for each UHIN number.

LEVEL V: Contains all Level IV data elements, plus the patient's beginning service date, and ending service date and procedure dates.

LEVEL VI: Contains all of the deniable data elements.

PART B. DATA

1. OUTPATIENT OBSERVATION DATA QUALITY STANDARDS

The Regulation requires hospitals to submit outpatient observation data 75 days after the close of each quarter. The quarterly data is then edited for compliance with regulatory requirements, as specified in Regulation 114.1 CMR 17.00: Outpatient Observation Data Specifications.

The Regulation specifies a one percent error rate, based on the presence of type A and type B errors as follows:

Type A: One error per outpatient observation stay causes rejection of discharge.

Type B: Two errors per outpatient observation stay causes rejection of discharge.

If one percent or more of the discharges are rejected, then the entire data submission is rejected by the Division, and the hospital is informed that the submission failed the edit process. These edits primarily check for valid codes, correct formatting, and the presence of required data elements. Please see listing of data elements categorized by error type in the Supplement Section.

Each hospital receives a quarterly error report displaying invalid outpatient observation stay information. Quarterly data which does not meet the one percent compliance standard must be resubmitted by the individual hospital until the standard is met.

The Division strives to include data that has passed the one percent compliance standard in the data files we release to the public. When this is not possible, we include data which did not meet the 1% standard (i.e. failed the edits). Submissions which have failed are referred to as Cautionary Submissions. Observation stays within submissions that have failed the edit process are assigned a special flag which indicates that the submission failed.

PART B. DATA

1. OUTPATIENT OBSERVATION DATA QUALITY STANDARDS

Data Verification Process

The year-end Outpatient Observation Data verification process is intended to present the hospitals with a profile of their individual data as retained by the Division. The purpose of this process is to function as a quality control measure for hospitals to review the data they have provided to the Division of Health Care Finance and Policy.

Hospitals have an opportunity to review their data each year. The Division produces a Profile Report for the hospital to review that contains a series of frequency distribution tables covering selected data elements. A complete listing of all tables is below.

Observation Visits by Month Average Hours of Service

Charge Summary Observation Type Distribution

Originating Referral/Transferring Source Secondary Referring/Transferring Source

Other Primary Caregivers Departure Status

Top 20 Zip Codes Gender Distribution

Race 1 Race 2

Ethnicity 1 Ethnicity 2

Hispanic Indicator Top 10 Primary Payors

Top 10 Secondary Payors Top 10 Primary Diagnoses

Top 10 Principal Procedures

PART B. DATA

1. OUTPATIENT OBSERVATION DATA QUALITY STANDARDS

Data Verification Process - Continued

After reviewing each Profile Report, hospitals are asked to file a response form which provides the Division with verification that the report has been reviewed. The Profile Report Response Form provides each hospital with two alternatives for their reply:

Hospital Agrees (also known as an "A" response): By checking this category, a hospital indicates its agreement that the data appearing on the Profile Report is accurate and that it represents the hospital's outpatient observation patient profile.

Hospital Discrepancies Noted (also known as a "B" response): By checking this category, a hospital indicates that the data on the report is accurate except for discrepancies noted.

If any discrepancies exist (i.e. a "B" response), the Division requests that hospitals provide a written explanation of the discrepancies, which will be included in this Outpatient Hospital Observation Documentation manual. Hospitals are strongly encouraged by the Division to review their Profile Report for inaccuracies and make necessary corrections so that subsequent quarters of data will be accurate.

PART B. DATA

2. GENERAL DATA CAVEATS

Information may not be entirely consistent from hospital to hospital due to differences in:

- Collection and Verification of patient supplied information at the time of arrival;
- Medical Record Coding, consistency, and/or completeness;
- Extent of hospital data processing capabilities;
- Extent of hospital data processing systems;
- Varying degrees of commitment to quality of data;
- Non-comparability of data collection and reporting

PART B. DATA

3. DIVISION CALCULATED FIELDS

Analysis of the UHIN data by the Division has turned up problems with some of the reported data for the inpatient and outpatient observation stays databases. For a small number of hospitals, little or no UHIN data exists as these hospitals failed to report patients' social security numbers (SSN). Other hospitals reported the same SSN repeatedly resulting in numerous visits for one UHIN. In other cases, the demographic information (age, sex, etc.) was not consistent when a match did exist with the UHIN. Some explanations for this include assignment of a mother's SSN to her infant or assignment of a spouse's SSN to a patient. This demographic analysis shows a probable error rate in the range of 2% - 10%.

In the past, the Division has found that, on average, 91% of the SSNs submitted are valid when edited for compliance with rules issued by the Social Security Administration. Staff continually monitors the encryption process to ensure that duplicate UHINs are not inappropriately generated, and that recurring SSNs consistently encrypt to the same UHIN.

Only valid SSNs are encrypted to a UHIN. It is valid for hospitals to report that the SSN is unknown. In these cases, the UHIN appears as '000000001'.

Invalid SSNs are assigned 7 or 8 dashes and an error code. The list of error codes are as follows:

```
ssn_empty = 1

ssn_notninechars = 2

ssn_allcharsequal = 3

ssn_firstthreecharszero = 4

ssn_midtwocharszero = 5

ssn_lastfourcharszero = 6

ssn_notnumeric = 7

ssn_rangeinvalid = 8

ssn_erroroccurred = 9

ssn_encrypterror = 10
```

**Based on these findings, the Division strongly suggests that users perform qualitative checks on the data prior to drawing conclusions about that data.

PART C. HOSPITAL RESPONSES

INDIVIDUAL HOSPITAL DISCREPANCY DOCUMENTATION

Boston Medical Center

Boston Medical Center agrees with the profile reports as submitted to the Commonwealth.

We have found discrepancies between the payor categories of free care & self pay due to timing lags in eligibility determination. When a patient presents themselves at the time of admission their primiary insurance category may be listed as self pay due to lack of any other coverage. The determination of final coverage as Free Care (and not self pay) often occurs months after the date of service, and months after the self pay designation is submitted to the DHCFP via the quarterly financial & case mix data.

In conclusion, the self pay category was the initial coverage and the coverage submitted to the State. The final determination of free care eligibility and free care coverage occurs later.

PART C. HOSPITAL RESPONSES

INDIVIDUAL HOSPITAL DISCREPANCY DOCUMENTATION

Caritas Good Samaritan Medical Center

The hospital has reviewed the FY2007 Outpatient Observation Data Profile Reports and agree that the data submitted is accurate.

I would like to make note of a few issues that are due to the state programming and have been reported for future correction.

011C - Ethnicity 1

Q1 total does not contain the correct total only because the state validation report is not accounting for blanks. The actual data submitted is correct.

011D - Ethnicity 2

All quarter totals are not correct only because the state validation report is not accounting for blanks. The actual data submitted is correct.

011E - Hispanic Indicator

State has reported this indicator is incorrect and should be corrected for the next year's validation process.

PART C. HOSPITAL RESPONSES

INDIVIDUAL HOSPITAL DISCREPANCY DOCUMENTATION

Caritas St. Anne's Hospital

The hospital has reviewed the FY2007 Outpatient Observation Data Profile Reports and agree that the data submitted is accurate.

I would like to make note of a few issues that are due to the state programming and have been reported for future correction.

006 - Secondary Referral/Transferring Source

The state validation report contains a dash, where it should be a "Y - Within Hospital SDS Transfer". The state validation report doesn't reflect the proper code of "Y" but the actual data submitted is correct.

011C - Ethnicity 1

Q1 total does not contain the correct total only because the state validation report is not accounting for blanks. The actual data submitted is correct.

011D - Ethnicity 2

All quarter totals are not correct only because the state validation report is not accounting for blanks. The actual data submitted is correct.

PART C. HOSPITAL RESPONSES

INDIVIDUAL HOSPITAL DISCREPANCY DOCUMENTATION

Faulkner Hospital

As of this date, the Faulkner Hospital is recording 1084 observation cases in FY2007. Variances can occur in the case count due to redeterminations of the patient status by the Hospital or an insurance company. The data reported is proportionately correct except for the following reports:

Report 005: the volume in the originating/transfering source 7 belongs in source R

Report 002: the average hours of service total 25.41 Report 003: the average charge per account is \$7600

PART C. HOSPITAL RESPONSES

INDIVIDUAL HOSPITAL DISCREPANCY DOCUMENTATION

Health Alliance Hospitals, Inc.

Variances are minimal and not statistically significant.

INDIVIDUAL HOSPITAL DISCREPANCY DOCUMENTATION

Massachusetts General Hospital

The hospital has reviewed the fiscal year 2007 Outpatient Observation Data Profile Reports and found errors in Race and Ethnicity for quarter 1 of FY 2007. This quarter was submitted prior to the implementation of stricter edits for many of the new fields.

The Race and Ethnicity fields are largely un-reported on the verification reports for Quarter 1. For quarter 1, the old race fields would have been used for submission but something should have been reported.

Since it is impossible to re-submit this data because of incomplete Present on Admission data for this time period, the data is signed-off with the caveat that Race and Ethnicity are underreported for this time period.

Thank you for the opportunity to comment on this issue.

PART C. HOSPITAL RESPONSES

INDIVIDUAL HOSPITAL DISCREPANCY DOCUMENTATION

MetroWest Medical Center

The Division has "unknown/not specified" for all patients. Data sent to the State does have the Hispanic Indicator field populated with either a "Y" or a "N".

PART C. HOSPITAL RESPONSES

INDIVIDUAL HOSPITAL DISCREPANCY DOCUMENTATION

Mount Auburn Hospital

The hospital has reviewed the observation verification report for FY 2007 for Mount Auburn Hospital, and have verified what I could. I cannot verify all of the data elements. The data elements I am having trouble with are in customer defined screens, since Meditech does not build additional data elements to add to its standard unless it is mandated nationally.

Discharge by Race 1 - I can verify only the first race listed Discharge by Race 2 - this is a customer defined screen Discharge by Ethnicity - cannot verify; customer defined screen Discharge by Patient Hispanic Indicator - not able to retrieve Average hours of service - not available to check

I have the data element discharge disposition to report on; I am not sure how to map it to discharge status, but overall it looks valid. However, all the other data elements I could verify are correct, including charges, which leads me to believe that the unverifiable data is also good.

PART C. HOSPITAL RESPONSES

INDIVIDUAL HOSPITAL DISCREPANCY DOCUMENTATION

Saint Vincent Hospital

Originating Referral/Transferring Source: The fourth quarter was complete prior quarters the sources were not provided in full detail

Secondary Referral/Transferring Source Other Primary Caregivers: The information was not available at this detail level.

Race 1 Distribution: The first quarter was not reported in the detail requested the other three quarters were reported in detail.

Race 2 Distribution: Most of the time Race 2 was not provided, first quarter no specific detail given.

Ethnicity 1 and 2 Distribution: The first quarter was no detail provided it began to be provided from the second quarter forward.

Hispanic Indicator Distribution: All 4 quarters were not able to provide detail information.

PART D. CAUTIONARY USE HOSPITALS

Faulkner Hospital Massachusetts Eye and Ear Infirmary

PART E. HOSPITALS SUBMITTING OBSERVATION DATA

Discharge and Charge Totals for Hospitals Submitting Data by Quarter

The following is a list of the discharge and charge totals for hospitals submitting fiscal year data by quarter. It is included here as a means of enabling users to cross check the contents of the electronic data file they receive.

Marlborough Hospital		
UMass. Memorial – Wing	Wing Memorial Hospital	
Memorial Hospital		
Waltham Hospital	Waltham-Weston Hospital	June 2002.
	Deaconess Waltham Hospital	Now closed.

Supplement IV. Mergers, Name Changes, Closures, Conversions, Non-Acute Care Hospitals

Closures

Date	Hospital Name	Comments
June 1989	Sancta Maria	
September 1990	Mass. Osteopathic	
June 1990	Hunt	Outpatient only now.
July 1990	St. Luke's	
	Middleborough	
September 1991	Worcester City	
May 1993	Amesbury	
July 1993	Saint Margaret's	
June 1994	Heritage	
June 1994	Winthrop	
October 1994	St. Joseph's	
December 1994	Ludlow	
October 1996	Providence	
November 1996	Goddard	
1996	Lynn	
January 1997	Dana Farber	Inpatient acute beds
		now at Brigham &
		Women's
March 1997	Burbank	
February 1999	Boston Regional	
April 1999	Malden	
August 1999	Symmes	
July 2003	Waltham	

NOTE: Subsequent to closure, some hospitals may have reopened for used other than an acute hospital (e.g., health care center, rehabilitation hospital, etc.)

Supplement IV. Mergers, Name Changes, Closures, Conversions, Non-Acute Care Hospitals

Conversions and Non-Acute Care Hospitals

HOSPITAL	COMMENTS
Fairlawn Hospital	Converted to non-acute care hospital
Heritage Hospital	Converted to non-acute care hospital
Vencor – Kindred Hospital	Non-acute care hospital
Boston	
Vencor – Kindred Hospital	Non-acute care hospital
North Shore	-

SECTION II TECHNICAL DOCUMENTATION

Part A. Calculated Field Documentation

1. Age Calculation

Brief Description:

AgeOfPatient is calculated using the DateDiff Function in Access, which subtracts the date of birth (DOB) from the End_Date. Age is calculated to the nearest year (the remainder is dropped) if patient is at least 1 year old. The AgeUnits field is assigned a value of 'YEARS'. Age is calculated to the nearest week (the remainder is dropped) if a patient is less than 1 year old. The AgeUnits field is assigned a value of 'WEEKS'.

If the observation did not pass the edits for any reason the age is not calculated and the AgeOfPatient field is set to zero and the AgeUnits field is left blank.

Detailed Description:

- 1. If the observation passed the edits then the DateDiff function is used to determine the age in weeks of the patient by subtracting the Date of Birth from the End of Service Date.
- 2. If the age in weeks is greater than 51 then the DateDiff function is used to determine the age in years of the patient by subtracting the Date of Birth from the End of Service Date and the AgeUnits is set to "Years".
- 3. If the age in weeks is less than or equal to 51 then the DateDiff function is used to determine the age in weeks of the patient by subtracting the Date of Birth from the End of Service Date and the AgeUnits is set to "Weeks".
- 4. If the observation did not pass the edits then the AgeOfPatient is set to zero and the AgeUnits field is left blank.

SECTION II TECHNICAL DOCUMENTATION

Part A. Calculated Field Documentation

2. Observation Sequence Number Calculation

Brief Description:

The file is sorted by PT_ID (Unique Patient ID also known as the UHIN) and End Date. The Observation Sequence Number (ObsSeqNo) is then calculated by incrementing a counter for each of the PT_ID's observation stays.

If the observation did not pass the edits for any reason the Observation Sequence Number is not calculated and the ObsSeqNo field is set to zero.

Detailed Description:

- 1. The file is sorted by PT_ID (Unique Patient ID also known as the UHIN) and End_Date.
- 2. The sequence number is calculated by incrementing a counter from 1 to nnn, where a sequence number of 1 indicates the first observation stay for a PT_ID and nnn indicates the last observation stay for the PT_ID.
- 3. If the observation did not pass the edits then the ObsSeqNo is set to zero.

SECTION II TECHNICAL DOCUMENTATION

Part A. Calculated Field Documentation

3. Number of Days Between Observation Stays Calculation

Brief Description:

The file is sorted by PT_ID (Unique Patient ID also known as the UHIN) and End Date. For PT_IDs with 2 or more observation stays the Number of Days Between Observation Stays (NoofDaysBtwObs) is calculated using the DateDiff Function in Access which subtracts the previous observation end date from the current End Date.

If the observation did not pass the edits for any reason the Number of Days Between Observation Stays is not calculated and the Noof DaysBtwObs field is set to zero.

Detailed Description:

- 1. The file is sorted by PT_ID (Unique Patient ID also known as the UHIN) and End_Date.
- 2. If this is the first occurrence of a PT_ID the Number of Days Between Observation Stays is set to zero.
- 3. If a second occurrence of a PT_ID is found then the Number of Days Between Observation Stays (NoofDaysBtwObs) is calculated by using the DateDiff Function in Access, which subtracts the previous observation end date from the current End_Date.
- 4. Step 3 is repeated for all subsequent observation stays until the PT ID changes.
- 5. If the observation did not pass the edits then the NoofDaysBtwObs is set to zero.

SECTION II TECHNICAL DOCUMENTATION

Part B. Data File Structure

1. Outpatient Observation .MDB File Structure

The Outpatient Observation database is now in Microsoft Access. The record layout can be obtained by going into the Design command of the database.

Please note: There are certain fields that are considered Deniable Data Elements. Depending on the level of data purchased, these fields may not be present on the file.

SECTION II TECHNICAL DOCUMENTATION

Part B. Data File Summary

2. Outpatient Observation Data Codes

The data codes for the required data elements that hospitals must report to the Division in accordance with Case Mix Regulation 114.1 CMR 17.00 can be found at:

http://www.mass.gov/Eeohhs2/docs/dhcfp/g/regs/114_1_17_ooa_data_specs.doc

Each recipient for outpatient observation data has been granted approval by the Division to receive a certain level of data. Please note that the higher levels contain an increasing number of Deniable Data Elements.
